## About Me

With my passion for web development and my experience, I strive to enhance users' online experiences. I am a dedicated Frontend Developer who is constantly committed to learning new technologies and keeping up with the latest trends in web design.

My belief in learning and self-improvement reflects my determination to provide the best solution for each project. Creating user-friendly interfaces and merging aesthetics with functionality has become a true passion for me. In every project, I work diligently, paying close attention to customer needs, user experience, responsive design, fast loading times, and browser compatibility.

Furthermore, my project management and communication skills assist me in successfully completing projects and working efficiently within a team. I take pride in my ability to adapt to the fast-paced developments in the web development field and my eagerness to learn new technologies. Engaging in creative projects and collaborating with team members brings me great satisfaction. Each new project offers an opportunity for learning and growth, which I eagerly embrace.

## Experience

- Mar 2023 - Present  
**Frontend Developer**  
Papel Technology

While at Papel Teknoloji I worked on developing web sites and admin panels. Using React.js, we built projects that closely aligned with the design prototypes from Figma. We created custom components following the BEM methodology using Ant Design and Sass. Additionally, we optimized localization using the i18n package and added animations to the web sites using libraries like Framer Motion and Scroll Magic.

- Jul 2022 - Mar 2023  
**Frontend Developer**  
Marti Technology

I actively contributed to the development of admin panels using Next.js, TypeScript, and Redux Toolkit. We created custom components following the BEM methodology using the Ant Design library and SASS. Our team embraced Agile methodologies and utilized tools like Jira and Slack for effective collaboration.

- Jun 2019 - Jul 2022  
**Frontend Developer**  
Maykim Group

I worked at Maykim Group where I gained valuable experience in frontend development. As part of the team, I utilized HTML, CSS, JavaScript, jQuery and Reactjs technologies, along with the Bootstrap, Chakra UI and Ant Design libraries. My main responsibilities revolved around improving and developing websites for the group's affiliated companies. Additionally, I contributed to the development of an e-commerce project website and worked on enhancing the functionality of internal admin panels used within the company.
